# About PrivacySwap

Slide 02 / 10

Founded in April 2021, PrivacySwap serves to build a Decentralized Finance ecosystem with competitive utilities, where users from different projects can come together to benefit from the variety of revenue streams.

PrivacySwap was developed by cybersecurity experts who wanted to build a long-term DeFi project. The platform's initial offerings included yield farms and vaults. It eventually grew to include a variety of competitive utilities, including PrivacyCard, utility based NFTs, a Launchpad, and finally the Decentralised Exchange (DEX).

PrivacySwap is constantly expanding its ecosystem to keep up with the demands of DeFi and in keeping with the fast paced crypto environment.

# About PrivacyCards

Slide 03 / 10

PrivacyCards is the first debit card that supports loading via web 3.0 wallets such as MetaMask. They are the fastest way to exchange your crypto for cash, reducing transaction fees in the process.

## About the Super Affiliate Program

The Super Affiliate Program works in conjunction with PrivacyCards. It provides unlimited earning opportunities to our affiliates, up to 100% of the allocated affiliate earnings.

Earnings are reflected real time on our partners' cards, for referrals who sign up via our affiliate link and transact on our card-loading platform.

# How it Works
